# February Sale Specials

## SHIFTED CEILING INSULATION - Is It Running Up Your Energy Bill?

How can you tell if your ceiling insulation has shifted? The two primary indicators you can see from the inside of the house are condensation and light. If you spot condensation on your ceiling this means there is no insulation within that area due to shifting, rodents, gravity and vibration. Another indicator is seeing transparent places in the ceiling material when the lights are dimmed and it is sunny outside. Do you need this issue repaired?

### February Only – Blown Insulation Special Pricing!!

What is your house size? Number of houses? (Receive our best pricing)  
Location? (This applies to PA & Eastern Shore Regions)

#### Pennsylvania

R15 - 20,000 – 30,000 sq. ft. @ \$ .153 per sq. ft.  
R15 - 30,000 plus sq. ft. @ \$ .147 per sq. ft.  
44' x 500' = 22,500 sq. ft. - \$ .153 = \$ 3,443
